Item	Speaker	Content ..... {Meeting Tweeter Ver 2.7 (U001R02) }
001	System	Meeting Started
002	Jason	Lets start the meeting. First item is SIDA Annual return for 2015. I have created the annual return draft in ROS website (https://app.ros.gov.sg/). I will submit it to ROS once I get the additional information from one of our new committee member (XiuFeng). Once that is done, Tan (President) and George (Treasurer) will have to login using their Singpass account to do the approval. Tan and George please take note.
003	Tan	OK
004	George	OK
005	Jason	Next, we will review our SIDA roadmap. Our current roadmap was done in 2012. It is now outdated and we need to create a new roadmap.
006	Jason	I have made a proposal for the committee. (Explaination of "Roadmap relationship diagram" and "Roadmap proposal")
007	Eddy	We need to raise awareness of SIDA to public. I suggest using individual inventors work to bring awareness to sida.
008	Jason	Noted. We are trying to lauch more SI-AP Projects. Once we have some sucessful one, we can then use it to bring awareness to public. At this moment, we don't have any successful yet. The roadmap show that our first priority is Projects. Tan is trying very hard to start new project that let SIDA members to participate. One example is Project Trolley which we will talk about later in the meeting.
009	Nick	We should get support from government with SIDA as a group.
010	Jason	Noted. We are going to launch a initiative called FOS or Friends of SIDA. We hope to collaborate with IPOS. I will explain this initiative later in the meeting.
011	Jason	Tat Cheng mentioned that he has some patent court case in his personal experience. I would hope that his experiences in this aspect can be brought to SIDA to share. Members will benefit from his experience.
012	Jason	A request to Tat Cheng. We like to hear from you on this issue. Please let me know when you are ready preparing the material so that I can put it into one of our agenda in meeting.
013	TatCheng	OK
014	Jason	If there is no other comment for the new SIDA Roadmap, I will let everyone go back and think about it. I will email the proposed roadmap after this meeting.
015	Jason	Next on the agenda is FOS (Friends of SIDA) and IPOS collaboration plan.
016	Jason	(Presentation of FOS-IPOS)
017	Eddy	I suggest to add a project evaluator/advisor committee into the last section.
018	Jason	Noted. This will be our SI-AP Advisors Project Team.
019	George	If we meet with IPOS, I expect IPOS to ask what successful project does sida has.
020	Jason	None at this moment. We has some failed one, but we are working hard. That's why we need IPOS help with FOS-IPOS.
021	Jason	The last section on SIDA management is to convince IPOS that we have credible people to oversea the FOS-IPOS collaboration. George and Kim will need to provide me with a nice photo and information about themself. I already have the news article on Tan, so I'll use it in the presentation. George and Kim, please take note.
022	George	OK
023	Kim	OK
024	Jason	Next I will show everyone the letter that we will write to IPOS Chief Executive Mr Tang Heng Shim Daren. (Review of letter)

Item	Speaker	Content ..... {Meeting Tweeter Ver 2.7 (U001R02) }
025	Kim	The last part, "detail" should be "details"
026	Jason	Noted.
027	Eddy	Better to change "I am writing..." to "We are writing..."
028	Jason	Noted.
029	Eddy	I write some suggestion and wrote it down, you may want to review it.
030	Jason	OK, I'll take a look to see how to incorporate it into the letter.
031	Nick	I have a suggestion, I know of Loyang Tua Pek Kong Temple (http://lytpk.org.sg) that do funding for some project. They may be willing to listen to SIDA and see how we can collaborate. I'll dig into this and let committee know in later meeting.
032	Jason	Noted.
033	Jason	Next on the agenda is SIDA logo third review. (Explaination on different SIDA logo options)
034	Jason	All members please review the logo options. I will call for a vote in the next meeting to decide if we want to stay with the old logo or proceed with a new one.
035	Jason	Next item is Project Trolley. This project was started by Tan. It went through its initial evaluation and the committee find that it is not feasible. Tan has told me that he want to open this project for all members who are interest to join.
036	Jason	Please note that this project is based on our previous experience with Project National.
037	Jason	If any members want to join this project as co-inventors, please also take note that every co-inventors will have to contribute money as funding to run the project.
038	Jason	(Explaination on Project Trolley, SI-AP Model #003A Version 1.0 and its accounting example)
039	Nick	The model need to have a mechanism to stop too many member to join a project.
040	Jason	The inventors of this project has the choice to decide who can join. This will put a limit to stop too many members from joining. At this moment in time, we should not see this problem yet.
041	Nick	The model another mechanism to kick out member in a project if they don't contribute.
042	Jason	Noted.
043	Jason	Project Trolley is now open to all SIDA members. If anyone is interested to join, please let me know before 26 Mar 2016.
044	Jason	Last item is of SI-AP System. (Presentation on SI-AP System version 1.0)
045	Jason	Any comment ?
046	Nick	My experience with patent is that it is better to assign a patent to a registered company in Singapore.
047	Jason	Noted.
048	Jason	If there is no other comment, I will attach SI-AP System version 1.0) in the next email. Please let me know before 26 Mar 2016. After that this become official and I will put it up in our website.
049	Jason	There is no more topic to discuss and I now declare the end of this meeting. If any of you is interested, you can stay back for Invention Gossip. I will show three new inventions in the market taken from YouTube.
050	Jason	(Invenion Gossip: Tensile Tent, PatchNride, ZipGripGo)
